Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded Shape	External Entity	A user or external system that sends or receives data from the system, such as Farmer, Weather API, or Agricultural Officer .
Rectangle with numbered header	Process	An activity that processes agricultural data, such as Collect Farm Data, Analyze Soil and Weather Data, Generate Crop Recommendations, or Optimize Irrigation .
Rectangle (solid fill, no number)	Data Store	A storage location where agricultural information is maintained for future use, such as Farmer Database, Sensor Database, Crop Database, or Recommendation Database .
Labeled arrow	Data Flow	Represents the movement of data between external entities, processes, and data stores, such as Sensor Data, Weather Information, Crop Recommendations, Irrigation Schedule, and Disease Alerts .

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
