Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to know which crop is best for my land • I need an easy way to improve crop production. • Fertilizer costs are increasing every year.	THINKS • Which crop will provide the highest yield? • Is the weather suitable for planting today? • Am I using the right amount of fertilizer?
Ramesh Kumar <i>Small scale Farmer</i>	
DOES • Checks soil conditions before planting. • Monitors weather forecasts regularly. • Applies fertilizers and irrigates crops.	FEELS • Worried about unpredictable weather. • Concerned about low crop yield. • Frustrated by rising farming expenses.
